

1) With vibe coding implement the playwright/typescript or any other tool which you work say Playwright/Javascript

The image displays a web application interface for a healthcare system, alongside an AI Browser Extension for Code Generation.

Web Application Interface:

- Search Bar:** Search by patient name, ID, MRN, Last Name, First Name, and Date and Time.
- Table:** A table listing patient information with columns: Patient ID, MRN, Last Name, First Name, and Date and Time.
- Table Data:**

Patient ID	MRN	Last Name	First Name	Date and Time
Automation_703788		Balistreri	Lavada	06/21/2026
Automation_080792		Runoffsdottr	Cathy	06/21/2026
Automation_288177		Gukowski	Cathryn	06/21/2026
20260720	20260720	Sargam	Sadhana	06/21/2026
Automation_703788	MRN-8375-055	Balistreri	Lavada	06/21/2026
Automation_703788	MRN-8375-055	Balistreri	Lavada	06/21/2026
Automation_632158	MRN-5881-053	Hill	Mara	06/21/2026

AI Browser Extension for Code Generation:

- Code Generator:** A section for generating code, including a "Supported Language" dropdown (JavaScript), a "Browser Engine" dropdown (Playwright), a "Select LLM Provider" dropdown (Groq), a "Select Model" dropdown (llama-3.3-70b-versatile), and a "Groq API Key" input field.
- Settings:** A section for configuring the extension, including a "Feature File" dropdown (Page Class) and a "Reset Chat" button.
- Code Output:** The generated code is displayed in a text area, showing a Playwright test script for a patient information page.

DevTools:

- Network:** A table showing network requests, including a "Fetch/XHR" request.
- Console:** A log of messages, including a "chat.completion" message.
